ProfiMaster 3000 system

The universal lifter Profimaster 3000 is a mobile lifting solution which can be used single or in systems with 2 or 4 columns. The Profimaster can be used for lifting cars, off-road-cars and vans as well as for small busses. Especially for the car-body repair the Profimaster 3000 is a significant assistance. The vehicle can be lifted from the side, from the front or from the back to bring it in a position which allows an ergonomic working position while welding, grinding and painting works.

accessoires included per column

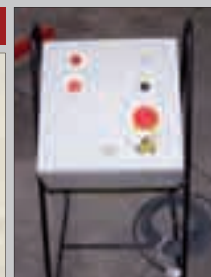

body clamb

fork for tyres

axle stands

control box for
2 or 4 column
